Election/Restrictions

The examiner acknowledges the election of the rocket and species as elected in the papers of 7/21/05, 11/3/05, and 2/10/06. The examiner also acknowledges the election of claims 1-4,6-12,15, 18-20 and 29. However claim 1 is allowable as seen below and therefore claims 5,13,16 and 17 are rejoined and therefore the remaining withdrawn claims are 23-26 and 28.

In response to applicants argument that claim 23 is dependent on claim 1, the examiner maintains that this is not a dependent claim in that the requirement of the apparatus of claim 1 is only in one of the many possible choices that can be made in the method of entertaining. Because of the many steps of which only one is required, one may choose only the limitation of "closing said fill valve" which is not dependent on any other structure and therefore the claims remain withdrawn.

EXAMINER'S AMENDMENT

Authorization for this examiner's amendment was given in a telephone interview with Andrew Knight on 4/20/06.

The application has been amended as follows:

At the end of **claim 29** a --,-- has been added. This is to fix an obvious omission in the claim.

Claims 5,13,16 and 17 are rejoined because they depend from allowable claims.

Claims 23-26 and 28 are cancelled.

Claims 1-13,15-20 and 29 are allowed.

1. The following is an examiner's statement of reasons for allowance: the prior art of record all failed to show either alone and/or in combination a rocket with an air-breathing external combustion rocket engine with fuel tank, working medium tank and combustor connected to the fuel tank and with a heat exchanger connected to the combustor and heating the working fluid tank. Also a nozzle is attached which is configured to provide thrust through the use of the high-energy working fluid. It is noted and taken that an external combustion rocket engine has the fuel burned and expelled without being in contact with the working fluid. The prior art discloses rockets and external combustion engines.
